We found that most students think robots can help us do housework. 37% of students think that they can help us study, so that we can improve our grades. 23% of students believe that robots can take care of the elderly. We were surprised to find that 12% of students thought that machines could chat and play with us. Only ten percent of the students think they can cook for us. **【高分句型一】** (调查结果)
